

Food Loss and Food Waste Policy

KCG Corporation Public Company Limited

“KCG Corporation is committed to adhering to internationally recognized quality and food safety management systems to ensure operational sustainability and minimize environmental impact. This commitment includes reducing food loss and food waste at every stage of the production and operational process, thereby maximizing efficiency and optimizing the use of raw materials in food manufacturing.”

In alignment with the requirements of the **FSSC 22000 Food Safety Management System**, KCG Corporation Public Company Limited has established the following objectives:

Objectives:

- To **reduce food loss** across the entire supply chain — including raw material sourcing, production, storage, transportation, and the management of non-conforming products — as well as in all activities involving stakeholders.
- To **manage food waste** efficiently and sustainably.
- To **improve resource utilization efficiency** for cost-effective and responsible food production.
- To **raise awareness and instill a sense of responsibility** among employees and all stakeholders.

This policy is issued to communicate the company's commitment and to be followed by all concerned parties, effective as of January 6, 2025.
